WORK EXPERIENCE

PT Magna Solusi Indonesia

Full Stack Developer Internship

January 2025 - June 2025

- Developed and integrated key software modules, ensuring seamless system functionality and user-friendly design.
- Engineered database management solutions, optimizing queries, backups, and performance.
- Built and maintained RESTful APIs for smooth data flow between Front-End and Back-End.
- Contributed to testing and QA to meet high standards of functionality, security, and usability.
- Created technical documentation and user guides for easy navigation of system features.
- Collaborated with Lead Developer and Project Manager to provide progress updates and identify areas for improvement.

EDUCATION

Universitas Indonesia

2022 – Present

Information System

GPA : 3.84/4.00

Courses: Data Structures and Algorithm, Enterprise Application Architecture and Programming, Operating Systems for Information Systems, Artificial Intelligence and Data Science Basics

Languages: English (Proficient), Bahasa Indonesia (Native)

PROJECT

PT Salaka Pranata Adicara - Enterprise Information System for Event Organizer

Full Stack Developer & Lead Engineer

February 2025 - May 2025

- Led the development of a full-featured system covering finance, marketing, purchasing, client/vendor management, invoicing, purchase order, and freelancer tracking.
- Established coding standards, configured CI/CD pipelines, and managed secure deployments in a Linux (Ubuntu) environment.
- Acted as lead engineer, managing engineering decisions and maintaining overall code quality.
