EDUCATION

- University of Indonesia (UI)** Jakarta, Indonesia
Bachelor of Computer Science, Information Systems Aug 2022 - Jun 2026 (Expected)
- **GPA: 3.84/4.00**
 - **Thesis Advisor:** Prof. Petrus Mursanto (Full Professor, former Dean of Faculty of Computer Science)
 - **Thesis:** Implementation of Morris Mano Computer Architecture with Enhanced Jump Branching Capabilities on Xilinx Spartan-3AN FPGA Platform (XC3S700AN) using VHDL
 - Extended baseline architecture by implementing jump branching in datapath for complex control flow operations
 - Designed and optimized digital logic circuits for hardware-level branching mechanisms
 - Investigated hardware resource utilization and timing constraints for branching logic optimization
 - Synthesized and tested on physical FPGA hardware, validating functional correctness and performance
 - **Relevant Coursework:** Computer Architecture, Operating Systems, Data Structures & Algorithms, Introduction to AI & Data Science, Statistics & Probability, Data Communication Networks, Database Systems

WORK EXPERIENCE

- Software Engineer Intern** Traveloka
Backend Development & Automation Aug 2025 - Apr 2026
- Engineered secure Credential Management System with AES-GCM encryption and MongoDB, implementing automated credential rotation and audit logging for enterprise-grade security compliance
 - Developed automated reschedule solution processing 1000+ daily bookings with 99.9% accuracy, reducing manual intervention by 85% through intelligent failover mechanisms and workflow optimization
 - Enhanced CI/CD pipelines with automated API testing and leveraged GitHub Copilot CLI for AI-assisted development, accelerating feature delivery by 30%
- Full Stack Developer Intern** PT Magna Solusi Indonesia
Enterprise Application Development Jan 2025 - Jun 2025
- Developed enterprise modules using Spring Boot and Angular with seamless frontend-backend integration, deploying across production environments
 - Optimized PostgreSQL database performance through efficient query design, indexing strategies, and stored procedures, reducing average response time by 35%
 - Built RESTful APIs for microservice architecture handling 10,000+ daily requests with sub-200ms response times

KEY PROJECTS

- Enterprise Information System for Event Organizer** Lead Engineer & Full Stack Developer
Feb 2025 - May 2025
- Led development of enterprise system using Spring Boot, Vue.js, and PostgreSQL with Docker containerization, implementing JWT authentication and RESTful API design
 - Deployed production-ready system with CI/CD pipeline, demonstrating end-to-end full-stack capabilities and DevOps practices

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, TypeScript, JavaScript | Spring Boot (Java), Vue.js, Angular, ASP.NET
Databases: PostgreSQL (SQL, PL/SQL, stored procedures), MongoDB, Oracle Database, BigQuery
Cloud & DevOps: Docker, Kubernetes, CI/CD pipelines, automated testing, infrastructure automation
Integration: RESTful APIs, microservices, Oracle Integration Cloud, JWT/OAuth authentication
AI/ML Tools: GitHub Copilot CLI, LLM API integration, Scikit-learn, prompt engineering

LEADERSHIP & ACTIVITIES

- Staff of IT Development Division** COMPFEST (Indonesia's Largest IT Event)
Aug 2023 - Sep 2024
- Led development of competition management platform serving 1000+ participants with real-time judging and leaderboard systems
