OBJECTIVE

Seeking Manufacturing Intern position to apply full-stack development, database optimization, and AI/LLM integration skills to drive digital transformation in manufacturing shopfloor operations, production workflows, and Oracle ERP Cloud integration at Baker Hughes.

EDUCATION

University of Indonesia (UI) Jakarta, Indonesia
Bachelor of Computer Science, Information Systems Aug 2022 - Jun 2026 (Expected)

- **GPA: 3.84/4.00**
- **Relevant Coursework:** Data Structures & Algorithms, Enterprise Application Architecture, Databases, AI & Data Science, Operating Systems, Computer Architecture

Nanyang Technological University (NTU) & ITS Singapore & Surabaya
INSPIRASI-NTU Summer Program 2025 (LPDP Scholarship Awardee) July 2025

- Applied software engineering principles to sustainable development challenges and environmental solutions

WORK EXPERIENCE

Software Engineer Intern Traveloka
Backend Development & Automation Aug 2025 - Apr 2026

- Engineered secure Credential Management System with AES-GCM encryption and MongoDB, implementing automated credential rotation and audit logging for enterprise-grade security compliance
- Developed automated reschedule solution processing 1000+ daily bookings with 99.9% accuracy, reducing manual intervention by 85% through intelligent failover mechanisms and workflow optimization
- Enhanced CI/CD pipelines with Karate automated API testing and auto-rollback logic, improving deployment reliability by 40% and reducing production incidents
- Built real-time data synchronization with BigQuery analytics and leveraged GitHub Copilot CLI for AI-assisted development, accelerating feature delivery by 30%

Full Stack Developer Intern PT Magna Solusi Indonesia
Enterprise Application Development Jan 2025 - Jun 2025

- Developed enterprise modules using Spring Boot and Angular with seamless frontend-backend integration, deploying across production environments and ensuring system stability
- Optimized PostgreSQL database performance through efficient query design, indexing strategies, and stored procedures, reducing average response time by 35%
- Built RESTful APIs for microservice architecture handling 10,000+ daily requests with sub-200ms response times, implementing proper error handling and logging
- Collaborated with cross-functional teams to gather requirements and deliver production-ready features within sprint deadlines

KEY PROJECTS

Enterprise Information System for Event Organizer Lead Engineer & Full Stack Developer
Feb 2025 - May 2025

- Led development of all-in-one enterprise system using Spring Boot, Vue.js, and PostgreSQL with Docker containerization, implementing JWT authentication and RESTful API design following industry best practices
- Deployed production-ready system with CI/CD pipeline, demonstrating end-to-end full-stack capabilities, DevOps practices, and system architecture design
- Designed database schema with normalization and indexing strategies, ensuring data integrity and optimal query performance

Used Car Sales Prediction Machine Learning Analyst
Apr 2025 - May 2025

- Built end-to-end ML pipeline using Python/Scikit-learn (Gradient Boosting, Random Forest) achieving 87% accuracy through comprehensive exploratory data analysis and feature engineering
- Implemented imbalanced data handling techniques (SMOTE, class weighting) and performed rigorous model evaluation using cross-validation and performance metrics
- Generated actionable business insights through data visualization and statistical analysis, demonstrating ability to translate technical results into business value

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, TypeScript, JavaScript, C# | Spring Boot, Django, Vue.js, Angular, React.js, ASP.NET

Databases & Data Systems: PostgreSQL (SQL, PL/SQL, triggers, stored procedures), MongoDB, Oracle Database (familiar), BigQuery

Cloud & DevOps: Google Cloud Platform, Docker, Kubernetes, CI/CD pipelines, automated testing (Karate), infrastructure automation

Integration & APIs: RESTful services, API design, JSON, XML, secure authentication (JWT, OAuth), microservices architecture, system integration, Oracle Integration Cloud

AI & Development Tools: GitHub Copilot CLI (AI-assisted development), Scikit-learn, TensorFlow, LLM API integration, prompt engineering

Development Practices: Agile/Scrum methodology, version control (Git), code review, test-driven development, documentation

LEADERSHIP & ACTIVITIES

Vice Person in Charge of UI/UX	COMPFEST (Southeast Asia’s Largest IT Event)
<i>Design Leadership</i>	<i>Jan 2023 - Dec 2023</i>
• Led team of 11 designers across 5 development sprints, implementing dark & light mode design system and collaborating with 20+ engineers on cross-functional requirements • Coordinated stakeholder communication and ensured design deliverables met business objectives and user experience standards	
Mentor	Programming Foundations 0
<i>University of Indonesia</i>	<i>Aug 2023 - Dec 2023</i>
• Mentored 30+ first-year students in programming fundamentals (Python, algorithms, problem-solving), demonstrating effective communication and teaching abilities
