WORK EXPERIENCE

PT Traveloka

Software Engineer Internship - Flight Team

August 2025 - Present

- Engineered a distributed logging system for multi-threaded services and structured JSON logging to improve traceability and debugging.
- Enhanced Credential Management System security by implementing AES-GCM encryption, audit trails, and automated password rotation.
- Implemented CI/CD pipeline enhancements using Karate for automated API testing with auto-rollback logic, ensuring production stability.

PT Magna Solusi Indonesia

Full Stack Developer Internship

January 2025 - June 2025

- Built robust APIs using Spring Boot and optimized SQL queries, improving database performance and system response times for reporting modules.
- Developed intuitive dashboards using Angular

EDUCATION

Universitas Indonesia

Information System

2022 – Present

GPA : 3.84/4.00

INSPIRASI - Nanyang Technological University (NTU)

LPDP Scholarship Awardee

Summer Program 2025

Apply software engineering principles to sustainable development challenges. Analyzed the role of technical architecture in environmental solutions and produced a report proposing a solution for a specific real-world sustainability problem.

COMPFEST - The Biggest IT Event in Indonesia held by Students

Vice Person in Charge of UI/UX

January 2023 - December 2023

Led a team of 11 to revamp the design system, collaborated closely with engineers to ensure seamless UI/UX integration

SKILLS

- **Languages & Frameworks:** Java (Spring Boot), Python, TypeScript, Angular, HTML/CSS.
- **Databases:** PostgreSQL, SQL, MongoDB.
- **Cloud & DevOps:** AWS, Terraform, Docker, Kubernetes, CI/CD Pipelines.
- **Testing & Tools:** Karate DSL, JUnit, Selenium, Git, Jira, Postman, Linux/Unix.
