PROFILE

AI-curious engineer who actively ships AI-assisted automation in production. Uses GitHub Copilot CLI daily, has cut 85% of manual work from a high-volume pipeline, and is excited to prototype MCP-connected agentic tools and measure their real impact on team productivity.

EDUCATION

University of Indonesia (UI) – Fasilkom Jakarta, Indonesia
Bachelor of Computer Science, Information Systems · GPA: 3.84 / 4.00 Aug 2022 – Jun 2026 (Expected)

- **Relevant coursework:** Introduction to AI & Data Science, Data Structures & Algorithms, Enterprise Application Architecture, Database Systems, Operating Systems, Data Communication Networks
- **Award:** LPDP Scholarship Awardee – INSPIRASI-NTU Summer Program 2025 (NTU Singapore & ITS)

WORK EXPERIENCE

Software Engineer Intern Traveloka · Jakarta
Backend Development, Automation & AI-Assisted Engineering Aug 2025 – Apr 2026

- Integrated **GitHub Copilot CLI** into daily engineering workflows – accelerating feature delivery and automated-test authoring, demonstrating how AI coding agents boost team velocity.
- Engineered an **automated reschedule pipeline** processing **1,000+ daily booking modifications** with 99.9% accuracy, reducing manual intervention by **85%** through failover mechanisms and workflow optimisation.
- Enhanced CI/CD pipelines with automated API testing (Karate) and auto-rollback logic; built a secure **Credential Management System** (AES-GCM encryption, audit logging) cutting security incidents by 90%.
- Built real-time data-sync services with structured logging piped to **BigQuery**, enabling operational analytics dashboards.

Full Stack Developer Intern PT Magna Solusi Indonesia · Jakarta
Enterprise Application Development Jan 2025 – Jun 2025

- Built RESTful APIs and full-stack modules (Spring Boot + Angular) for a production enterprise system; deployed containerised services on Docker + Kubernetes.
- Optimised PostgreSQL performance through indexing and stored-procedure refactoring, reducing p95 response time by **35%**.

KEY PROJECTS

Used Car Sales Prediction – ML Pipeline Machine Learning Analyst
Python · Scikit-learn · Gradient Boosting · K-Means Apr 2025 – May 2025

- Designed end-to-end ML pipeline (EDA → preprocessing → model selection → evaluation) for imbalanced multi-class classification, regression, and customer-segmentation clustering.
- Achieved best-in-class F1 on imbalanced data using SMOTE oversampling and Gradient Boosting; interpreted results to surface actionable business insights.

Enterprise IS for Event Organizer Lead Engineer & Full Stack Developer
Spring Boot · Vue.js · PostgreSQL · Docker Feb 2025 – May 2025

- Led a team to deliver an all-in-one operations platform (finance, freelancer tracking, scheduling) with JWT authentication, RESTful API design, and CI/CD deployment – shipped on time and on spec.

TECHNICAL SKILLS

Languages: Python, TypeScript / JavaScript, Java, Go
Backend & APIs: Spring Boot, Django, RESTful API design, microservice architecture
AI & Agentic Tooling: GitHub Copilot CLI, LLM API integration, Scikit-learn, prompt engineering, agentic workflow design
Cloud & DevOps: Docker, Kubernetes, CI/CD pipelines (GitHub Actions), automated testing (Karate), auto-rollback
Databases: PostgreSQL, MongoDB, BigQuery
Version Control & Collaboration: Git / GitHub (branching strategies, PR workflows, code review)

LEADERSHIP & ACTIVITIES

Vice Person in Charge of UI/UX COMPFEST – Indonesia’s Largest IT Event
Jan 2023 – Dec 2023

- Led 11 designers across 5 sprints; delivered redesigned website and dark/light-mode design system; coordinated with software and automation engineers.
- Mentored first-year students as **Programming Foundations 0 Mentor**, Faculty of Computer Science, UI (2024).
