EDUCATION

- University of Indonesia (UI) — Fasilkom** Jakarta, Indonesia
Bachelor of Computer Science, Information Systems — GPA: 3.84/4.00 Aug 2022 – Jun 2026 (Expected)
- **Relevant Coursework:** Introduction to AI & Data Science, Enterprise Application Architecture, Database Systems, Data Communication Networks, Operating Systems
 - **LPDP Scholarship Awardee** — INSPIRASI-NTU Summer Programme 2025, Nanyang Technological University (Singapore); applied software engineering to sustainability challenges

WORK EXPERIENCE

- Software Engineer Intern** Traveloka · Jakarta (WFO)
Backend Engineering, AI-Assisted Development & Automation Aug 2025 – Apr 2026
- Built automated flight-booking reschedule pipeline processing **1,000+ daily transactions** with **99.9% accuracy**, cutting manual intervention by **85%** via configurable agentic scrapers and failover logic
 - Integrated **GitHub Copilot CLI** into team workflows as an agentic productivity layer, accelerating feature delivery and raising automated test coverage across the backend squad
 - Engineered Credential Management System with **AES-GCM encryption** and granular audit logging on MongoDB — traceability and compliance built in from day one
 - Built real-time data-sync services and structured-logging pipelines feeding **Google Cloud BigQuery** dashboards; CI/CD with Karate automated testing on GCP infrastructure
- Full Stack Developer Intern** PT Magna Solusi Indonesia · Jakarta (Hybrid)
Enterprise Application Development Jan 2025 – Jun 2025
- Delivered enterprise modules (Spring Boot + Angular) for corporate clients across the full implementation lifecycle; designed RESTful APIs handling **10,000+ daily requests** at sub-200 ms latency
 - Optimised PostgreSQL through query tuning, indexing, and stored procedures, reducing average response time by **35%**

KEY PROJECTS

- Used Car Sales Prediction — ML & Business Intelligence** Machine Learning Analyst
Python · Scikit-learn · Gradient Boosting · Random Forest · Clustering Apr – May 2025
- Built multi-model pipeline (Gradient Boosting, Random Forest, K-Means) combining imbalanced classification, regression, and clustering to surface commercial insights from raw vehicle sales data
- Enterprise Information System — Event Organizer** Lead Engineer & Full Stack Developer
Spring Boot · Vue.js · PostgreSQL · Docker · JWT Feb – May 2025
- Led end-to-end delivery of a production enterprise platform (finance, freelancer tracking, secure auth) — full ownership from architecture through Docker deployment and CI/CD release

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, TypeScript, Golang | Spring Boot, Vue.js, Angular, Django
AI & GenAI Tooling: GitHub Copilot CLI, agentic workflow design, LLM API integration, Scikit-learn (classification, regression, clustering), prompt engineering
Cloud & DevOps: Google Cloud Platform (BigQuery, GCP infrastructure), Docker, Kubernetes, CI/CD | AWS: actively pursuing Solutions Architect certification
Databases & Integration: PostgreSQL, MongoDB, BigQuery, RESTful APIs, microservice architecture
Security & Governance: AES-GCM encryption, JWT/OAuth, audit logging, credential rotation, compliance-aware system design

LEADERSHIP & ACTIVITIES

- Vice Person in Charge of UI/UX** COMPFEST — Indonesia's Largest IT Event (Fasilkom UI)
Jan – Dec 2023
- Directed **11-person** design team through 5 agile sprints; primary liaison across design, engineering, and automation divisions — cross-functional stakeholder alignment at scale
- Mentor — Programming Foundations 0** Faculty of Computer Science, University of Indonesia
2024
- Translated complex technical concepts for first-year students; developed the clear communication style essential for technical consulting
