EDUCATION

University of Indonesia (UI) — Fasilkom Jakarta, Indonesia
Bachelor of Computer Science, Information Systems — GPA: 3.84/4.00 Aug 2022 – Jun 2026 (Expected)

- **Relevant Coursework:** Data Structures & Algorithms, Database Systems, Operating Systems, AI & Data Science, Data Communication Networks, Enterprise Application Architecture
- **LPDP Scholarship Awardee** — INSPIRASI-NTU Summer Programme 2025 at Nanyang Technological University (Singapore) & ITS; applied software engineering principles to sustainable development challenges

WORK EXPERIENCE

Software Engineer Intern Traveloka · Jakarta (WFO)
Backend Engineering & Data Automation Aug 2025 – Apr 2026

- Built automated flight-booking reschedule pipeline processing **1,000+ daily transactions** at **99.9% accuracy**, reducing manual intervention by **85%** via configurable scrapers and intelligent failover logic
- Engineered real-time data-sync services and structured-logging pipelines feeding **BigQuery** analytics dashboards, enabling data-driven operational decisions at scale
- Developed secure Credential Management System with AES-GCM encryption, automated rotation, and granular audit logging on MongoDB
- Enhanced CI/CD pipelines with Karate automated API testing and auto-rollback logic; leveraged GitHub Copilot CLI to accelerate development velocity and code quality

Full Stack Developer Intern PT Magna Solusi Indonesia · Jakarta (Hybrid)
Enterprise Application Development Jan 2025 – Jun 2025

- Optimised PostgreSQL database through query tuning, indexing, and stored procedures, cutting average response time by **35%** for high-volume data workflows
- Designed RESTful APIs in a microservice architecture handling **10,000+ daily requests** at sub-200 ms latency; deployed via Docker and Kubernetes
- Delivered full-stack enterprise modules (Spring Boot + Angular) with seamless frontend-backend integration across production environments

KEY PROJECTS

Marmut Merah Jambu — Music & Podcast Streaming Platform Full Stack Developer
Django · PostgreSQL · Manual SQL · Triggers · Stored Procedures · REST API Mar 2024 – Jun 2024

- Built full-stack streaming platform with Django backend and PostgreSQL, writing manual SQL, triggers, and stored procedures for playlist management and song playback state
- Designed relational database schema from scratch; handled DDL, DML, and complex CRUD operations across multiple normalised tables

Used Car Sales Prediction — ML Data Analysis Machine Learning Analyst
Python · Scikit-learn · Gradient Boosting · Random Forest · Pandas · NumPy Apr 2025 – May 2025

- Built predictive models (Gradient Boosting, Random Forest, Logistic Regression) on imbalanced dataset using over-sampling/undersampling, achieving strong classification and regression performance
- Performed full EDA pipeline with Pandas and NumPy: data preprocessing, feature engineering, K-Means clustering, and actionable business-insight reporting

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, Java, SQL, Golang
Frameworks & Libraries: Django, Spring Boot, Vue.js, Angular | Scikit-learn, Pandas, NumPy
Databases: PostgreSQL (stored procedures, triggers, query tuning, indexing), MongoDB, BigQuery
Infrastructure & DevOps: Linux, Git, Docker, Kubernetes, CI/CD pipelines, Google Cloud Platform
Data & Automation: ETL pipelines, real-time data sync, web scraping, structured logging, REST APIs

LEADERSHIP & ACTIVITIES

Vice Person in Charge of UI/UX COMPFEST — Indonesia's Largest IT Event (Fasilkom UI)
Jan 2023 – Dec 2023

- Led **11 designers** across 5 agile sprints to redesign compfest.id and launch a new design system; served as primary liaison across software engineering and automation divisions

Mentor — Programming Foundations 0 Faculty of Computer Science, University of Indonesia
2024

- Guided first-year students through foundational programming and problem-solving in a group learning environment
