WORK EXPERIENCE

PT Traveloka Software Engineer Internship - Flight Team August 2025 - Present

- Engineered a secure Credential Management System with AES-GCM encryption, automated rotation snapshots, and granular MongoDB audit logging to improve security and traceability.
- Developed scalable account-authentication automation services with configurable scrapers and failover backup mechanisms to ensure high availability.
- Implemented Karate-based API test automation in CI/CD with auto-rollback safeguards, and built an automated reschedule solution processing thousands of daily booking changes at 99.9% accuracy.

PT Magna Solusi Indonesia Full Stack Developer Internship January 2025 - June 2025

- Built and integrated full-stack modules using Spring Boot and Angular, improving reliability and maintainability across internal workflows.
- Optimized PostgreSQL query performance and developed RESTful APIs to support scalable data flows and stronger application responsiveness.

COMPFEST Vice Person in Charge of UI/UX January 2023 - December 2023

- Led 11 designers across 5 sprints to renew the design system and deliver dark/light mode while collaborating with engineering and automation teams.

EDUCATION

Universitas Indonesia Information Systems 2022 - Present

GPA : 3.84/4.00

INSPIRASI - Nanyang Technological University (NTU) Scholarship Awardee Summer Program 2025

- Applied software engineering principles to sustainable development challenges and produced a report proposing an architecture-driven solution for a real-world sustainability problem.

COMPFEST - The Biggest IT Event in Indonesia Held by Students Vice Person in Charge of UI/UX January 2023 - December 2023

- Led a team of 11 to revamp the design system and worked closely with engineers to ensure seamless UI/UX integration.

SKILLS

- Languages & Frameworks : Java (Spring Boot), Python, TypeScript, Golang, Vue.js, Angular, React.js.
- Databases : PostgreSQL, SQL, MongoDB.
- Cloud & DevOps : Google Cloud Platform, BigQuery, Docker, Kubernetes, CI/CD Pipelines.
- Testing & Tools : Karat , Git/GitHub, Linux/Unix, REST API Design, AES-GCM, Structured Logging.
